SKILLS

React js , JavaScript, Tailwind CSS,HTML, CSS, GitHub

PROJECTS

NetFlix-Gpt [↗](#)

Developed a secure and efficient movie and TV show browsing application, implementing Firebase authentication for user sign-in/sign-up, ensuring protected routes accessible only to authenticated users. Integrated real-time search functionality with multi-language support, utilizing memoization for optimal performance in fetching and displaying content from the TMDB API.

Key features:

- Robust Authentication System for secure Login/Sign-up using Google Firebase.
- Intuitive Sign In/Sign Up Form for hassle-free access.
- Smooth redirection to the Browse Page for uninterrupted exploration of movie content.
- Dynamic Header for an immersive browsing experience.
- Engaging the Main Movie Display and Background Trailers for an enticing visual experience using TMDB API's.

GitHub :<https://github.com/AJAKSHAY77/netflix-gpt.git> [↗](#)

Tech Stack:

- React Js, Redux Toolkit, Tailwind CSS, React-Router-Dom,Git & GitHub

Munchmate [↗](#)

Developed Munchmate, a dynamic Food Ordering Web App powered by Swiggy Live API. Implemented essential features such as intuitive search, top-rated restaurant display, detailed restaurant information using the useParams hook, and seamless cart ,management with Redux.js.

Key features

- Search Food ,Top Rated Restaurants and Cuisine s ,Lazy Loading, Accordion , Add to Cart , Food,Clear Cart, Shimmer UI

GitHub : <https://github.com/AJAKSHAY77/react-3.0.git> [↗](#)

Tech Stack-TailWind CSS, JavaScript, React.js, Redux.js, Parcel

youtube Clone [↗](#)

A YouTube Clone using React.js and Redux Toolkit for robust state management, enriched with real-time chat via API polling and a sophisticated nested comment system implemented with Redux. Styled with Tailwind CSS for a polished interface, ensuring seamless navigation using React Router.

Key Features:

- Real-time chat using API polling
- Nested comment system with Redux
